Smart Agriculture App

What is Flutter?

Flutter is an open-source SDK developed by Google

Flutter uses Dart programming language which is optimized for fast apps on any platform, easy to learn, and allows you to develop high-performing applications. From just one codebase, Flutter allows a development team to build applications for mobile, web, desktop, and embedded devices.

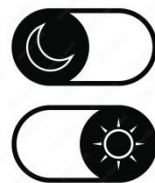

-The application can be installed on both Android and iOS phones.

-Ease of handling the application with simple design and comfortable colors for the eyes.

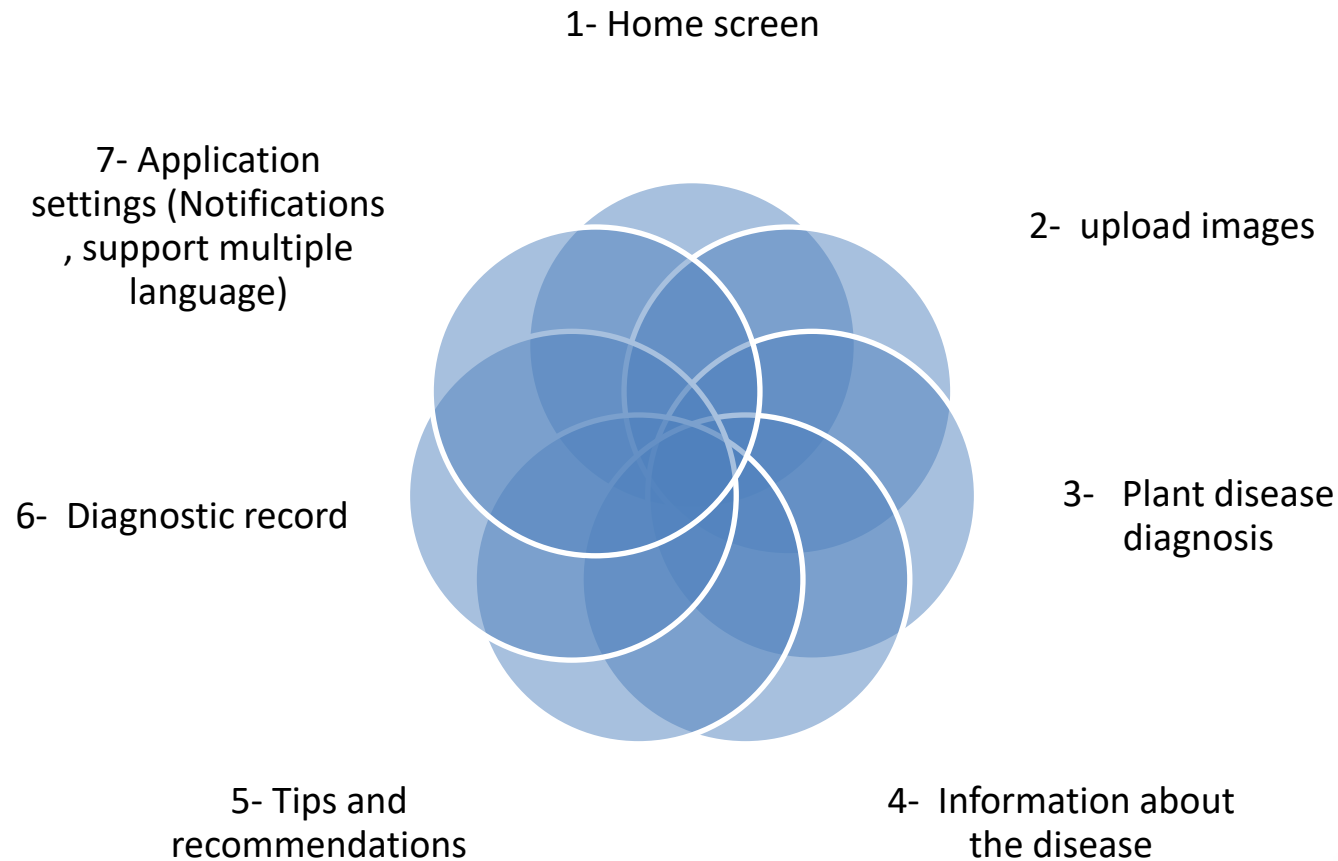

-The application is available in Arabic and English Languages

- Implement light & dark mode 'we care for your eyes

What app should be include:

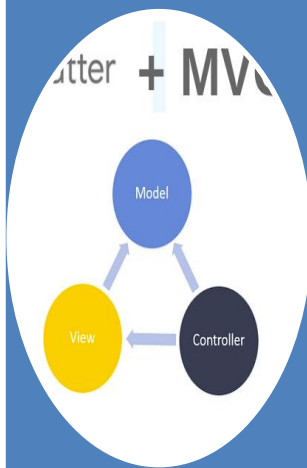

GetX
